Subject: RE: FFS Model Peer Review Comments

We are evaluating the peer reviewers' comments on the FFS model and will keep you informed of any changes that we make to the model, as has been our practice with respect to FFS work. Please let me know if you have any questions.

Correct the 3/14 CAG Meeting....

>>> Robert Law 3/15/2013 9:42 AM >>>

Alice, Eugenia and Stephanie:

The CPG understands based on the 3/24 CAG meeting that Region 2 has recently received peer review comments on the FFS Model. Consistent with Region 2's goal to fully and openly collaborate with the CPG as it develops the LPR/NB Model, the CPG respectfully requests that Region 2 provides the FFS Model peer review comments to the CPG as soon as possible (i.e., within 10 working days of receipt). Peer review comments that are directly relevant and related to the CPG's development of the sediment transport model and chemical fate and transport model should immediately be provided to the CPG so that CPG can address them in its RI/FS model development. The CPG also requests a meeting or teleconference/web-meeting between the Region 2 and CPG Modeling teams prior to April 5 to review and discuss the FFS Model peer review comments.

Please contact me to confirm these requests.

Thank you.
